Abstract

Presentation Device

09/ 700 258

A presentation device (1) with a base (5), with bars (3) for a flexible stand (2) connectable or connected to the base (5) via a plug connection, and with a holding means for a placard, a film or the like presentation carrier (6), for connecting the latter to the base (5) and the stand (2), wherein the stand (2) has individual bars (3), which are pluggable together or plugged together, and at least two transverse struts (4) for achieving a double-H-structure of the stand (2).
